
RTX5060 / 416px / FP32 / actual batch1; preprocessing + inference + postprocessing, no loading or I/O.
Primary matched 6-epoch arms: n=3 with 95% t CI; corrected loader/network batches verified.
Secondary zero-finetuning diagnostics: n=1 without seed SD/CI; native 80c filtered to person.
Historical timing excluded: old loader invalid; corrected cohorts unstable (same checkpoint: 18.97 vs 32.14 ms).
No speedup inferred; timing summaries describe this session. Fix+tune combines restoration + recipe.
Combined interventions and n=1 diagnostics do not isolate an architecture effect.
